

CSU0021 Computer Graphics Homework Assignment 2

Due: November 3, 23:59'59"
(10% penalty for each late day)

1. Add more control options to the rotating cube example in the October 21 lecture, including at least the following:
 - Buttons to move forward, backward, left, right. Your code must respond to the button events and adjust the eye position properly.
 - Buttons to increase or decrease the field of view (FOV). Your code must respond to the button events and adjust the field of view properly.
 - Optional: you may use keystrokes to control the movement or slider to control the FOV.

Please submit your program source files (including the HTML and JS code) at <http://moodle2.ntnu.edu.tw/course/view.php?id=822>. You do NOT need to include the utility code (i.e. MV.js...etc.) in the Common folder.
